github.com/enu-style • LinkedIn Profile

PROFESSIONAL PROFILE

Software Engineering student at Injibara University with a growing foundation in web development, programming, databases, and application design. Interested in building practical software that solves real-world problems, learning through hands-on projects, and improving code through testing and iteration.

EDUCATION

Injibara University

Software Engineering — Student

Developing foundational knowledge in software development, programming, database systems, and software problem-solving.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React, responsive design
Backend & APIs	Node.js, Express.js, REST APIs
Databases	PostgreSQL, Prisma ORM
Programming	JavaScript, Java, problem-solving
Tools	Git, GitHub, VS Code, npm, Vite

SELECTED PROJECTS

Injibara University Campus Problem Reporting System

React, Node.js, Express, PostgreSQL, Prisma • GitHub repository

Developing a campus-focused reporting platform for issues such as water supply, electrical lighting, and toilet facilities. Features include user authentication, complaint tracking, comments, and role-based access control.

Grace Hotel Management System

Java, PostgreSQL, JDBC • GitHub repository

A hotel management project focused on organizing hotel operations and storing application data in a relational database.

Apple Website Clone

HTML, CSS, JavaScript • GitHub repository

A frontend practice project focused on recreating a polished website layout and responsive user interface.

Student Management System

Java, PostgreSQL, Swing • GitHub repository

A student information management project using a desktop interface and a relational database.

CERTIFICATIONS & LEARNING

- Programming Fundamentals — February 2026
- Artificial Intelligence Fundamentals — February 2026
- Data Analysis Fundamentals — February 2026
- Android Developer Fundamentals — February 2026
- E-Learning — certificate available
